Hands on practice!

Math for young children doesn't have to involve practice pages! Children often learn best by doing. Try some of the following to help your children strengthen their math skills:

- Give your child a group of objects (20 or less) and have them count how many.
- Give your child 10 objects, ask them how many they will have if you take away 3. Repeat with other amounts.
- Encourage your child to create shapes using clay.
- Have your child find shapes around the house.
- Give your child items to sort. You might use colorful cereal pieces that your child will sort into color groups. Or, give your child different sizes of building blocks for them to group by size.
- When playing in the sandbox, encourage your child to write numbers using their finger.
 - Just count! When out and about, encourage your child to count flowers, red cards or other items of interest.

- ⑤ a Answers vary.
Example:

- b Answers vary.
Example:

- ⑥ a 4, 3
Each correct answer receives 0.5 point.
b 5, 10
Each correct answer receives 0.5 point.

- ⑦ a taller than
b heavier than

- ⑧ a 2
b 4

Short Answer Questions

(1 to 11: 2 points each;
12: 3 points)

1

Compare.

Circle all the groups with the same number of objects.

2

Color each box that shows the number that is less.

a

3	4
---	---

b

10	7
----	---

3

Count.
Fill in each blank.

a

circle	
--------	--

b

rectangle	
-----------	--

- a Compare.
Circle the group that has fewer.

- b Fill in the blank.
5 is 1 less than _____.

- Color the with a number greater than 3.

Color each box that has a greater number.

a

b

Color the with a number less than 8.

Circle each correct shape.

a Which shape can stack on itself?

b Which shape can slide?

Match.

10 What is the missing shape?
Circle it.

a

b

 Fill in each blank.

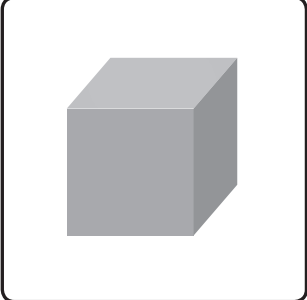

a A hexagon has _____ sides.

b A triangle has _____ corners.

12 Circle each correct shape.

a A  has 1 curved surface.

b A  has 6 flat faces.

c Which shape can both roll and stack on itself?
